Levothyroxine for Ethan Brooks

Order ord_3017885f · AWAITING_REVIEW · prescribed by Dr. Erik Lindqvist

Rx: 0.1 mg, 1×/day, 90 days, oral | 45.0 y · 78.0 kg | Acme Health PPO

Conditions

- Lactose intolerance
- Hypothyroidism

Allergies / avoids

- Colorant (any dye)
- Animal-derived

Current medicines

None.

Proposed formulation

Strength	Make	Beyond-use date
100 mcg/capsule	90 capsules	180 days

Capsule in **Microcrystalline cellulose fill, hypromellose (vegetarian) capsule** · 1 capsule (100 mcg) once daily

Label: Take 1 capsule by mouth once daily. Store at room temperature.

Beyond-use date source: No product-specific study: USP <795> default beyond-use date applies

Bases ruled out

- Lactose fill, gelatin capsule: Contains Gelatin; patient avoids Animal-derived.
- Microcrystalline cellulose fill, gelatin capsule: Contains Gelatin; patient avoids Animal-derived.

Insurance coverage

Acme Health PPO · member ACM-919-05 · synthetic demo plan

Recommended	Patient copay	Prior authorization
compounded Levothyroxine 100 mcg/capsule capsule	$30	Needed

Covered options

- compounded Levothyroxine 100 mcg/capsule capsule: $30 copay, prior auth

- Levothyroxine oral solution: $75 copay, prior auth (THYQUIDITY (Oliva Therapeutics, LLC), Tirosint SOL (IBSA Pharma Inc.))

Denied or unsuitable

- Levothyroxine tablet: covered, but every product conflicts with the patient (Contains D&C Yellow No. 10; patient allergic to Colorant (any dye).)
- Levothyroxine capsule: covered, but every product conflicts with the patient (Contains D&C Yellow No. 10; patient allergic to Colorant (any dye).)

Message to prescriber

```
Dr. Erik Lindqvist: no change needed for Ethan Brooks. We will prepare compounded
Levothyroxine 100 mcg/capsule capsule and request prior authorization.
```

Prior authorization request

```
Prior authorization request: compounded Levothyroxine 100 mcg/capsule capsule for Ethan
Brooks (member ID ACM-919-05, Acme Health PPO).
Prescribed by Dr. Erik Lindqvist: Levothyroxine 0.1 mg, 1x/day.
Not covered or unsuitable:
  - Levothyroxine tablet: covered, but every product conflicts with the patient (Contains
D&C Yellow No. 10; patient allergic to Colorant (any dye).)
  - Levothyroxine capsule: covered, but every product conflicts with the patient (Contains
D&C Yellow No. 10; patient allergic to Colorant (any dye).)
Covered commercial alternatives that are suitable: Levothyroxine oral solution (THYQUIDITY
(Oliva Therapeutics, LLC), Tirosint SOL (IBSA Pharma Inc.)) at $75 copay with prior auth.
The compound is requested as the lower-cost option ($30 copay).
Plan rule: Compounded prescriptions need prior authorization showing that no covered
commercial product is suitable for the patient.
```

Compounding procedure

Ingredients

- Levothyroxine USP 9.2 mg
- Microcrystalline cellulose fill, hypromellose (vegetarian) capsule to 18400 mg total blend

Equipment

- Analytical balance
- Mortar and pestle
- Capsule filling machine
- Capsule shells (size 3)

Steps

1. Calculate for 92 capsules (90 + 2 extra): 0.1 mg × 92 = 9.2 mg Levothyroxine.
2. Dose is under 1 mg per capsule, so weigh an aliquot: mix 100 mg Levothyroxine USP with 9.9 g filler (1:100 trituration), then use 0.92 g of this mix.
3. Weigh filler (from Microcrystalline cellulose fill, hypromellose (vegetarian) capsule) to a total blend of 18.4 g.

4. Mix drug and filler by geometric dilution until uniform.
5. Fill 92 capsules (size 3) using the capsule machine or punch method; target 200 mg each.
6. Weigh 10 capsules; each must be within ±10% of target weight.
7. Package 90 capsules, label and store: room temperature.

Quality checks

- Capsule weight within ±10%
- Content uniformity (visual)
- Second person verifies calculation

Label text

- Take 1 capsule by mouth once daily. Store at room temperature.
- Discard 180 days after the compounding date (beyond-use date).
- Compounded medication. Keep out of reach of children.

Demo only. A licensed pharmacist must verify every step.

Safety findings

WARN · regulatory — 2 commercial product(s) look suitable for this patient: THYQUIDITY (Oliva Therapeutics, LLC, oral solution); Tirosint SOL (IBSA Pharma Inc., oral solution). Under FDA section 503A, document the clinical reason a compounded version is needed.
